

ENVISION

LIFE CYCLE MANAGEMENT

DEVELOPING A BASELINE

As part of our upfront consultation, we collect key information to develop a baseline of your current IT and Telecom environment including: **SERVICES, ASSETS, COSTS AND CONTRACTS.**

Our extensive experience working with large enterprise customers has given us a wealth of valuable insight into their needs, both met and unmet. We recognized opportunities to address major gaps in Telecom Expense and Activity Management that would result in significant savings and superior value for clients. As a result, we created EnVision Life Cycle Management.

EnVision delivers a powerful set of tools that support cost reduction and a single point of administration/control for third party providers, services, activities, and accounting - all driven by our team of subject matter experts.

With our experience, Seapoint Technologies knows the process inside and out.

We also understand the challenges, including the resources and expertise needed to managed multiple locations

around the world, effectively troubleshoot and resolve technical issues, and execute on the sheer volume of related administrative tasks.

Our proprietary, AI-driven EnVision Life Cycle Management enables clients like you to do more, with less.

EnVision serves as an extension of your organization to:

- **Reduce Costs & Complexity**
- **Optimize Services**
- **Streamline Management, Administration & Support**
- **Provide Visibility & Detailed Reporting**
- **Enable Technology Transformation**
